The original design had taken the form of a dumbbell, with fuel storage and the thermonuclear pulse engines concentrated at one end, and the computers and sensitive reconnaissance instruments carried at the far end of a long, connecting, structural boom to keep them safely away from drive-section radiation. The modifications added after 2015 for creating and accommodating the first Chironians had entailed extensions to the instrumentation module and the incorporation of auxiliary motors which would spin the dumbbell about its center after arrival in order to simulate gravity for the new occupants while the first surface base was being prepared..be, but who may also be Death with facial hair, says, "Curtis Hammond. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..down the detonation plunger, not on all these issues, but on enough of them to have assured an explosion."Who does, dear?"..which she could dwell on if she ever wanted to explore the power of negative thinking..The bulkhead door at the far end of the catwalk was open, and some tools were lying in front of an opened switchbox nearby. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Stern's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples."..Fate possessed the sharper teeth, the stronger jaws..Leilani looked up at last, her lovely face
