I've done my job. I'm quitting." THE FIRST BOMB exploded in the center of Canaveral City in the early hours of the morning, causing serious damage to the maglev terminal where the spur line into the shuttle base joined the main through-route from Franklin out to the Peninsula. Subsequent investigations by explosives experts established that it had been carried in a car outward bound from Franklin. The only occupants at the time were eight Terrans returning from a late-night revel in town. They were killed instantly..Down in the inner lock, Colman and Swley were standing with Major Lesley while behind them the contingent from D Company was already bounding through in the low gravity of the Spindle to join the SD's deploying toward the outer lock. As far as Borstein could see, with himself and the Army behind him, Kalens had all the authority he needed-provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borstein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borstein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..Sterm nodded slowly as he ticked off the points one by one in his mind, looking at Stormbel coolly, then turned to Gaulitz, one of the senior scientists, who was sitting with some advisers to one side of the room. "Let us be certain about the Kuan-yin," he said. "The success of the entire operation is at stake. You are quite sure?". "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death-a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written..Noah smiled. This was one reason he liked her. Class and style without pretension. "Exactly"..It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them.. "Maybe I was stupid because I wanted to be stupid."..Chapter 15
