"They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said..eccentric.".Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible color as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweeplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks..Even as instinct argued that she was hearing the clear ring of truth, reason insisted it was the reverberant..He smiled. Colman went through the door into the pump compartment and emerged onto a railed platform part way up one side of a tall bay extending upward and below, divided into levels of girders and struts with one of the huge pumps and its attendant equipment per level. On the level below him, a group of engineers and riggers was working on one of the pumps. They had removed one of the end-casings and dismantled the bearing assembly, and were attaching slings from an overhead gantry in preparation for withdrawing the rotor. Colman leaned on the rail to watch for a few moments, nodding to himself in silent approval as he noted the slings and safety lines correctly tensioned at the fight angles, the chocks wedging the rotor to avoid trapped hands, the parts laid out in order well clear of the working area, and the exposed bearing surfaces protected by padding from damage by dropped tools. He liked watching professionals..Micky had no appetite. She left the pie untouched. "She really was in an institution once, wasn't she?".KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him.
